

Into Tomorrow

Sir Robert
McALPINE

Sir Robert M^cAlpine is a family-owned building and civil engineering company employing more than 2,000 people across the UK.

We are honoured to have worked on some of Britain's most iconic buildings and projects, such as the Olympic Stadium, O2 Arena, the Eden Project, Victoria Gate Shopping Centre in Leeds, the M74 Completion in Glasgow, Bloomberg's European HQ in London and Victoria Square in Woking.

The values at the heart of our operations include a commitment to the highest standards of safety, quality, engineering excellence and sustainability along with an unswerving focus on the needs and aspirations of our clients.

Our aim is to make a positive impact on the communities and the environments in which we operate.

We are family

We believe being inclusive and nurturing a diversity of talent and skills will help us to continue our legacy of technical excellence.

Like any family, we value and celebrate the differences that make each of us unique and the strength this diversity brings.

We rely on and support each other. And like any family, we function best when we are open and honest and take the time to listen.

It is an ethos that runs throughout our business. In everything we do, we act with integrity, treating people fairly and doing what we say we will.

On every project we aim to treat our clients, our supply chain partners and the communities we work with as part of our extended family.

**As a family
business, for us,
it's always personal.**

I feel part of Sir Robert M^cAlpine. It's definitely the family vibe. You get it from day one.

Rakulan Kuhnathan
Graduate Engineer

If there is one reason for our enduring success over the last 150 years, it is the quality of our people. Their commitment to technical expertise, client service and exemplary project delivery makes us the company we are.

Our people are passionate about what they do, delivering the exceptional time and again. It's an aspiration that unites us all and it's the reason we've worked on some of Britain's most iconic buildings and projects.

Consistently achieving excellence doesn't happen by chance. Which is why we are committed to investing in and supporting our people throughout their careers so that they reach their full potential.

Our people make us different

As a contemporary construction business seeking to attract, retain and nurture the brightest talent, inclusion and diversity couldn't be higher on our agenda. It is fundamental to enabling us to deliver against our overarching business strategy.

Karen Brookes

Executive Director of People & Infrastructure

Building on a 150 year legacy

Familiar to Harry Potter fans the world over as ‘the bridge to Hogwarts’, the magnificent 30m tall, 21-arch Glenfinnan Viaduct is part of the 64km Fort William to Mallaig extension of the West Highland Railway.

The railway remains to this day testimony to the spirit, skill and determination of all involved.

A masterclass in innovation and sustainability, Bloomberg’s inspiring new European headquarters allowed the financial and media giant to bring all its London employees under one roof.

The entire project team worked together to meet Bloomberg’s aspirations for a model of sustainability.

Collaboration and innovation

Heritage renewed

A landmark in Leeds’s cultural and social history for nearly 100 years, in its latest incarnation, The Majestic provides seven storeys of high quality office accommodation.

Technical excellence

We took the myriad complexities of refurbishing one of the most famous sports venues in the world in our stride at Wimbledon No.1 Court.

For three months of each year we packed up the entire site – cranes, plant and all – leaving the court in a safe state for players, visitors and staff alike.

Proudly building Britain's future heritage
