Gateway Central

March 2021

Dear Neighbour

Please see below this month's update with information on construction activity at the Gateway Central project.

Progress over the past month:

- Completion of reinforcement concrete capping beam construction, basement propping installation and monitoring system
- Completion of basement excavation across the site and cleaning down of the exposed piles
- Waterproofing and reinforcement works to the basement raft foundation
- Further construction of ground floor structure to the south of the site

Planned works for March 2021:

- Construction of the basement and ground floor concrete structure
- Commence removal of temporary props following basement raft construction sequence
- Assembly and commencement of slipform core construction. This is a frame which moves up gradually throughout the day allowing for continuous concrete supply to form the building core (for lifts and staircases). More information is provided on the next page for these works.
- Some extended works activities to commence in agreement with LBHF Environmental Health Office where large concrete pours are carried out and finishing the surface needs to be completed into the evening once the concrete has commenced the curing process. .
- Gate 1, 2 and 3 all in use for more for deliveries as we continue with concrete structure works.

Foundation pre-employment programme

A fully funded pre-employment programme for anyone who is unemployed or not currently working in construction is currently available. The programme is being run by Keltbray who are undertaking the concrete works at Gateway Central and is in conjunction with TfL.

The course is offered via a virtual classroom so candidates will need access to a computer and the internet. Training includes: Introduction to Construction, Manual Handling, Mental Health Awareness, Resilience Advantage, Asbestos Awareness, Health & Safety Awareness, and attainment of a CSCS card.

If you would like more information or to register your interest, please email gatewaywhitecity@srm.com

Slipform Core Construction – Due to Commence End of March 2021

Once the central area of the basement raft foundation is in place the slipform rig will be assembled in the basement, it will commencement movement at the end of the March from Basement level. The rig will climb to level 11 allowing the concrete core walls and stairs to be constructed in advance of the steel frame erection.

For Health and Safety reasons associated with the pandemic extend hours will need to be worked in agreement with the LBHF Environmental Health Office. Hours are expected to be worked from 7am – 9pm with noise restrictions in place. Further details will be provided later this month
